

MJ-Reports

Enterprise Class Reporting for PcHunter and Tempus Fugit Version 7

Even today, success flows from a formula. To set goals and analyze your progress towards reaching those goals you need effective reporting.

MJ-Reports is the core reporting engine of PcHunter and Tempus Fugit Version 7. Using this enterprise class tool you can extract critical business intelligence and present the information in high quality, customizable report formats directly from your database.

MJ-Reports is built around a runtime version of Crystal Reports, from Crystal Decisions, the world's leading information infrastructure company and a division of Seagate Technology. Crystal Reports is recognized as the best-of-breed reporting, analysis and information delivery software suite for over 10 years.

Included standard in PcHunter and Tempus Fugit is a runtime version of Crystal Reports Version 8.5. Using this runtime version you can run the built-in reports and any report downloaded from MPPOnline. By upgrading to Crystal Reports Standard or Professional edition, you can publish content to the Web and generate a wide variety of report types including sub-reports, conditional, summary, cross-tab, form, drill down, OLAP, Top N, multiple details, mailing labels, etc. Crystal's suite offers powerful wizards to help novice and expert users quickly assemble highly interactive reports. Your reports can include logos, pictures, shapes and colors.

Business Analysis Reports

MJ-Reports includes several pre-formatted reports including:

Daily Planner Worksheet

This powerful view of your prioritized action plan for the day can be viewed and sorted by Date, Priority or by Search Assignment with each category subdivided and clustered, just like your day.

Recruiter's Day View

Provides recruiters with a bird's eye view of the activities and results that made up the day or week. By planning and managing your action plan and then being able to review the results, you can more effectively turn activity into production.

Owner/Manager Day View

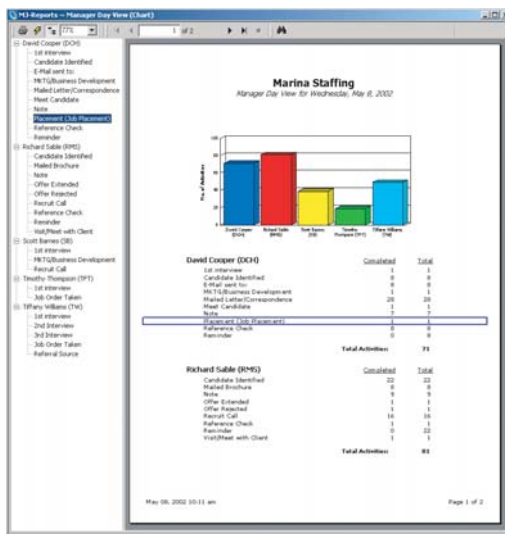

This report enables you to create real management accountability with individual recruiters or workgroups. Manage quotas, targets or contests and use this business intelligence for reviews, coaching and sales management.

Production Reports

Provides a view of placements made by Industry, Client or other criteria.

Business Analysis Reports

Also included are a number of comprehensive business analysis reports that allow you to report on historical activity and production—or lack thereof. You can generate reports on companies, contacts and candidates that you have NOT spoken with, NOT coded or categorized or NOT updated in your database. This will enable you to generate a plan to reactivate prospective clients and candidates as well as determine where you are producing and where you are NOT!
